Experience

Frontend Software Developer (Contract) | HeavySet Tech

Feb 2026 - Mar 2026

- Designed and integrated React web form components within an existing client production codebase.
- Debugged and optimized frontend components while adhering to existing CI/CD pipelines, automated testing requirements, and deployment standards.
- Implemented responsive UI behavior using CSS media queries to ensure consistent functionality across devices.

AI Trainer / Software Engineer (Contract) | Handshake AI

Mar 2026 - Present

- Analyzed and debugged AI-generated software solutions across existing repositories, delivering validated production-ready fixes.
- Developed fail-to-pass (F2P) regression tests to validate bug resolution and ensure corrected implementations passed failing edge cases.
- Worked with Git-based development workflows including repository cloning, branch management, code integration, and PR submission.

Night Auditor | Springhill Suites by Marriott

Jun 2020 - Present

- Independently managed overnight hotel operations as the sole on-site administrator, handling guest services, operational issues, and property oversight.
- Performed nightly financial reconciliation and audit procedures to ensure data accuracy.
- Resolved customer and operational issues independently in a fast-paced environment.

Projects

AI-Powered D&D Character Creator | Python, Quart, OpenAI API, Poetry, GitHub Actions, AWS, Docker

- Built an asynchronous backend application integrating the ChatGPT API in Python with Docker-based containerization and automated CI/CD via GitHub Actions to streamline deployment and debugging
- Implemented query optimization and prompt engineering logic to improve response quality, consistency, and adherence to character creation protocol.
- Incorporated Quart to handle non-blocking API requests, enabling scalable user interaction and integrating logging and metrics to monitor performance

Project Hermes | PHP, JavaScript, HTML, CSS, MySQL, Google APIs, Apache, Git, Postman

- Architected and developed a full-stack web application that allows teams to create, store, and retrieve shared notes.
- Implemented a modular application architecture separating frontend, backend, and database responsibilities, utilizing PHP, JavaScript, and SQL to support authenticated user workflows.
- Built integrations with Google Sheets and Google Docs APIs to automate cloud synchronization and maintain consistency between local database records and external collaboration platforms.

Education

Idaho State University

Dec 2025

B.S. in Software Engineering (GPA: 3.86 / 4.00)

- **Achievements:** Magna Cum Laude Graduate & Dean's List Member, Recipient of the North Wind STEM Scholarship for Academic Excellence
- **Coursework:** Secure Systems & Networks, Advanced OOP, Advanced Web Development, Database Design & Implementation, DSA, Computer Architecture, Software Engineering, Mobile App Development

Skills

- **Languages:** Python, JavaScript, C#, Java, SQL
- **Tools & Platforms:** Git, GitHub, Linux, GitHub Actions, Docker, AWS, MySQL, PostgreSQL, Postman
- **Frontend:** HTML, CSS, React
- **Backend:** Node.js, REST APIs, Relational Databases, PHP
- **Engineering Practices:** Object-Oriented Design, Collaboration, Version Control, Full-stack Development
